

JIZHOU GUO

Homepage • sjtu18640985163@sjtu.edu.cn • [LinkedIn](#) • [Google Scholar](#) • [Github](#)

Research Interests: Large Language Models, AI for Science.

EDUCATION

Shanghai Jiao Tong University • Shanghai, China Aug 2022 – Present
Bachelor of Science • Zhiyuan College (**Honor, Top 10%**) • Mathematics and Applied Mathematics • GPA: 3.77
Courses: Introduction to Computer Science, Foundations of Data Science, Selected Topics in Scientific Computing, Numerical Analysis and Scientific Computing, Probability, Stochastic Process, Real Analysis, Ordinary Differential Equations, Partial Differential Equations, Differential Geometry.

PUBLICATIONS

** denotes equal contribution*

Model-Based Differentially Private Knowledge Transfer for Large Language Models

Zhaomin Wu*, **Jizhou Guo***, Junyi Hou, Bingsheng He, Lixin Fan, Qiang Yang

Under review [[arXiv](#)]

Calibrating Reasoning in Language Models with Internal Consistency

Zhihui Xie, **Jizhou Guo**, Tong Yu, Shuai Li

NeurIPS 2024 [[arXiv](#)]

Olfactory-EEG Paradigm: Emotion Elicitation and Cross-Stimulus Transfer Learning Analysis

Jiaqi Wang, Zhengting Chen, Yifan Wu, Keyan Huang, Dian Zhang, **Jizhou Guo**, Xinglan Liu, Dan Peng, Weilong Zheng, Baoliang Lu

Under review

RESEARCH EXPERIENCE

Xtra Group - National University of Singapore

Jun 2024 – Oct 2024

Advisor: [Prof. Bingsheng He](#)

- Proposed **Llamdex**, a novel framework that integrates privacy-preserving, domain-specific models into LLMs.
- Demonstrated significant performance gains in domain-specific tasks, **with up to 26% accuracy improvement** while maintaining differential privacy guarantees.
- Achieved comparable inference efficiency to base LLMs while enhancing domain-specific capabilities.

John Hopcroft Center for Computer Science - Shanghai Jiao Tong University

Oct 2023 – May 2024

Advisor: [Prof. Shuai Li](#) and [Dr. Tong Yu](#)

- Developed a novel “**internal consistency**” approach to calibrate reasoning in Large Language Models (LLMs), **resulting in a significant boost in reasoning performance**.
- Conducted in-depth analysis of Chain-of-Thought (CoT) reasoning in LLMs through the lens of internal representations.

Zhiyuan Innovative Research Center - Shanghai Jiao Tong University

Dec 2022 - Jan 2024

Advisor: [Prof. Bao-Liang Lu](#) and [Prof. Wei-Long Zheng](#)

- Designed and executed experiments to predict human emotions from EEG signals under various olfactory stimuli.
- Implemented and compared multiple deep learning models (MLP, CNN, Transformer) with Domain-Adversarial Neural Networks (DANN).

Quantitative Biology Summer School - Center for Life Sciences, Peking University

Jul 2023

- Completed advanced courses in Systems Biology, Computational Neuroscience, and Bioinformatics, earning relevant certifications.
- Conceptualized and simulated a novel bio-responsive bandage using MATLAB, modeling drug diffusion processes for optimized wound healing.

Tencent Spark Project - Tencent Corporation

Aug 2022

- Engineered a robust palm liveness detection system.
- Integrated MediaPipe library to implement real-time palm movement validation.
- Developed an innovative screen detection algorithm using RGB to YCrCb color space conversion, successfully blocking palm images displayed on screens and improving overall system reliability.

COURSE PROJECTS

Deep Reinforcement Learning: Insights from AlphaGo

Spring 2024

Team leader, advised by [Prof. Dan Hu](#) (**Scored 100**)

- Demonstrated the core mechanisms of AlphaGo, corresponding deep reinforcement learning approaches, and related theoretical frameworks.

Frequency principle in deep learning

Autumn 2023

Individual project, advised by [Prof. Zhi-Qin John Xu](#) (**Achieved the top score**)

- Observed frequency principle: deep neural networks often fit target functions from low to high frequencies.
- Conducted experiment on frequency principle when fitting different functions or using different hyperparameters.

Fresnel Integral & Van der Waals equation

Spring 2023

Team project, advised by [Prof. Zhenli Xu](#)

- Tested and compared the performance of various methods when calculating Fresnel Integral.
- Compared the performance of Newton's method and fixed point iteration method when solving Van der Waals equation.

SELECTED AWARDS

Contest Prizes

- **Third prize** in Mathematics competition of Chinese College Students (Shanghai), Dec 2023
- **First prize** in Shanghai Collegiate Programming Contest, Sep 2023 (**Ranked 2nd in Shanghai**)
- **Gold medal** in Astar Programming Contest (Shanghai region), Aug 2023 (**Ranked 2nd in Shanghai**)
- **Gold medal** in 2023 China Collegiate Programming Contest (**CCPC**) National Invitational Contest (Hunan), May 2023
- **Gold medal** in 2023 International Collegiate Programming Contest (**ICPC**) Xi'an Invitational Contest, May 2023
- **Gold medal** in 2022 International Collegiate Programming Contest (**ICPC**) Asia Hangzhou Regional Contest, Dec 2022 (**Ranked 8th nationwide**)
- **Gold medal** in 2022 China Collegiate Programming Contest (**CCPC**) (Shanghai region), Sep 2022
- **Silver medal** in National Olympiad in Informatics (**NOI**), Jul 2021
- **Ranked 22nd nationwide** in National Olympiad in Informatics (**NOI**) Online Senior Group, Mar 2021

Honors

- Merit Student in the Student Community (**Among 19 SJTU undergraduate and graduate recipients**)
- Second-Class Academic Scholarship, SJTU (**Top 5%, ranked 2nd overall**)
- Zhiyuan Honors Scholarship (**twice**)

SKILLS

- Programming languages: Python, C/C++, Matlab, GNU Bash, \LaTeX .
- Language: Chinese (Native Speaker), English (Proficient, TOEFL 105, CET6 648).
- Expertise & Hobbies: Piano (Amateur Level 10), Singing (Amateur Level 9), Music Theory (Amateur Level 5).
