RESEARCH EXPERIENCE

BDSC Lab - University of Illinois Chicago

Jun 2025 – Aug 2025

Advisor: [Prof. Philip S. Yu](#)

- Developed a highly parameter-efficient reward model leveraging the LLM hidden states, which systematically outperforms baselines with less than 0.005% of the parameters of baselines.
- Proposed PSG-Agent and a benchmark for personalized guardrail of LLM-based agents.

Xtra Group - National University of Singapore

Jun 2024 – Aug 2024

Advisor: [Prof. Bingsheng He](#)

- Proposed a novel framework that facilitates LLM customization as a service for domain-specific applications. It achieved substantial performance improvements in domain-specific tasks, boosting accuracy by up to 26% while preserving privacy.

John Hopcroft Center for Computer Science - Shanghai Jiao Tong University
